

Ford Transit Mobility Conversion

Wheelchair accessible conversions on the Ford Transit are the perfect solution for **special care facilities** and **commercial transportation service providers**. Featuring a variety of seating / wheelchair combinations and a contoured, OEM-style interior, these conversions are ideal for the varied needs of commercial paratransit services. Our mobility specialists will be happy to assist you in determining which accessible conversion best suits your needs.

We are pleased to offer Ford Transit commercial mobility conversions manufactured by Malley, a Canadian company that meets the high standards of the Ford Motor Company Qualified Vehicle Modifier (QVM) program for mobility conversions.

- Variety of flooring options available
- Side or rear wheelchair lift (Braun or Ricon)
- Multiple seating and wheelchair configurations available
- Available with an easy-to-clean, energy-absorbent thermoformed interior
- Retractable wheelchair restraints
- Meets CSA D409 & CMVSS Standards
- Optional Smartfloor track system provides flexible seating and wheelchair configurations

Ford Transit Connect Mobility Conversion

The spacious and versatile lowered floor Ford Transit Connect conversion is ideal for **families, care homes, schools, hotel shuttles** and **taxi services**. As an accessible vehicle, it carries one safely-secured wheelchair and five seated passengers (including the driver). The manually-activated fold-out rear-entry ramp is easy to lower. When not in use, the ramp can fold flat to provide lots of storage space. This conversion is virtually undetectable, with only two slits in the rear bumper to accommodate the ramp installation. With dual sliding doors, access for seated passengers is possible from the street and passenger sides of the van.

Malley is the only Canadian company authorized by Ford Motor Company to perform a lowered floor conversion on the Ford Transit Connect van.

Our mobility specialists will be happy to assist you in determining which Malley accessible conversion best suits your needs.
